

Aims

- Strengthen national recruitment base + quality for promoting research on infectious diseases and other risks to health
- Strengthen domestic + international networking

Added value for participants

- Access to national network, courses etc.
- Co-funding of travel/accommodation costs for announced activities

Who can register?

- PhD students + postdocs active in research on infections and antibiotics

Register via www.ndpia.se!

- Project description (1 page)
- Short CV
- Certificate of registration or employment
- Letter of support from supervisor/group leader

Some past and future activities

- Pathogens and immunity evasion strategies (LU)
- National Course in Molecular Virology (Smögen)
- EMBL-EBI modules in bioinformatics (UmU)
- Protein structure and drug design 160118-19 (LU)
- Infection metabolomics 160223-24 (UmU)
- Network meeting in Gothenburg 160411-12
- Vaccine workshop in Gothenburg 160413-15

Management

- Coordinated by MIMS (Molecular Infection Medicine Sweden) at UmU
- National Steering Board + Regional Directors of Studies, representatives from all collaborating universities (GU, KI, LiU, LU, UmU, UU)
