

NDPIA Network Meeting 11-12 April, 2016

Conference Centre Wallenberg, GU

Day 1 11 April	
08.30-09.00	Registration/poster mounting + coffee
09.00-09.30	Introduction of the Doctoral Program (NDPIA) Åke Forsberg and Anna Holmström, Umeå University
	NDPIA international partners
09.30-09.45	Norwegian Research School in Infection Biology and Antimicrobials (IBA) Michael Koomey, University of Oslo/ Johanna Ericson Sollid University of Tromsø
09.45-10.00	Welcome to the Helmholtz Centre for Infection Research Lucky Mulwa, Helmholtz Center for Infection Research (HZI), Braunschweig, Germany
10.00- 10.15	ILRS Jena - unravelling the complex networks of microbial and biomolecular interactions Christine Vogler, International Leibniz Research School, Jena, Germany
10.15- 10.30	Coffee
10.30- 12.30	Speed dating
12.30-13.30	Lunch
13.30-14.15	Establishment of the gut microbiota in infancy Ingegerd Adlerberth, University of Gothenburg
14.15-15.00	The infant gut microbiota and allergy development Maria Jenmalm, Linköping University
15.00-16.30	Poster session 1 (odd poster numbers) + coffee
16.30-16.45	Characterisation of antiviral and antimicrobial secondary metabolites from myxobacteria, actinomycetes and fungi Lucky Mulwa, HZI/Braunschweig, Germany
16.45-17.00	<i>Yersinia pseudotuberculosis</i> blocks degranulation of secondary granules in human neutrophils Nayyer Taheri, Umeå University
17.00-17.15	Analyses of the genome sequences from the <i>Streptococcus mitis</i> group Francisco Salvà Serra, University of Gothenburg
17.15-18.45	Poster session 2 (even poster numbers) + snacks
19.00-	Dinner and networking + Ajibola Omokanye /Explainartist

NDPIA Network Meeting 11-12 April, 2016

Conference Centre Wallenberg, GU

Day 2 12 April	
08.45-09.00	Transposon-derived circular forms in <i>Acinetobacter baumannii</i> Nabil Karah, Umeå University
09.00-09.15	Rotavirus genotype shifts among children and adults in Western Sweden 2010 - 2014 Maria Andersson, University of Gothenburg
09.15-09.30	EF-Tu is a Cross-reactive Moonlighting Protein in Non-typeable <i>Haemophilus influenzae</i> Benjamin Duell, Lund University
09.30-09.45	Mecillinam resistance in clinical isolates and laboratory-selected mutants of <i>Escherichia coli</i> Elisabeth Thulin, Uppsala University
09.45-10.00	Unravelling the structure and diversity of human, animal and environmental resistomes using metagenomics Chandan Pal, University of Gothenburg
10.00-10.30	Coffee and networking (at the poster area)
10.30-10.45	Examining the role of cattle microbiota on colonization of VTEC O157:H7 Lena-Mari Tamminen, Swedish University of Agricultural Sciences
10.45-11.00	Contact-dependent growth inhibition in bacteria induces antibiotic persistence Anirban Ghosh, Uppsala University
11.00-11.30	Studying the human microbiome Tony Wu, University of Gothenburg
11.30-12.15	Gut microbiota and metabolic disease Fredrik Bäckhed, University of Gothenburg
12.15-13.15	Lunch
13.15-14.15	Evaluation of the meeting and discussion of future activities Åke Forsberg, Umeå University
14.15-14.30	Presentation of poster awards and closing of the meeting Åke Forsberg, Umeå University
