

# Zoonotic infections 161024-27, Uppsala University

## Course organizers

The National Doctoral Program in Infections and Antibiotics (NDPIA) and the Dept. of Cell and Molecular Biology (ICM), Uppsala University.

Contact information: Sanna Koskiniemi (sanna.koskiniemi@icm.uu.se), Marie Wrande (marie.wrande@icm.uu.se) and Staffan Svärd (staffan.svard@icm.uu.se)

## Language

English

## Prerequisites

The course is aimed for PhD students and Postdocs but the seminars are also open for master students and researchers.

## Objective

The aim is to provide a broad view of zoonotic infections and touch upon both epidemiology and molecular mechanisms of zoonotic infections. The course will also provide a platform for informal meetings for researchers in the field of zoonotic infections, which will foster contacts and collaborations.

## Content

This is a two-part course, where the first part (A) focuses on zoonotic bacterial infections and the second (B) on zoonotic parasitic infections. Each part consists of two days with 6 seminars and a group project that will be presented at the end of the two days. At the end of day two, there will be an informal mingle with all course attendants (both part A and B) with focus on career paths. Each part equals to 1 ECTS and the full course (12 seminars, 2 group projects and mingle) to 2 ECTS.

## Examination

Attendance at seminars and group work is mandatory. In addition, presentation of group work will be used for examination.

## Credits

1 + 1 ECTS

## Additional Information

Registration deadline: 7 October, 2016.

NDPIA members should register via the link <http://ndpia.se/events/zoonotic-infections/> and non-NDPIA members can apply to the course by sending an e-mail to [anna.holmstrom@umu.se](mailto:anna.holmstrom@umu.se) and are welcome to participate on a first-come-first served basis if there are vacancies.

A maximum of 25 participants will be admitted to the course.
