

**POST-DOCTORAL POSITION
IMMUNOBIOLOGY AND PATHOGENESIS LAB
CEDOC, NOVA MEDICAL SCHOOL, LISBON, PORTUGAL**

The Immunobiology and Pathogenesis Laboratory (<http://cedoc.unl.pt/immunobiology-and-pathogenesis/>) at the CEDOC- Chronic Diseases Research Centre, NOVA Medical School, Lisbon, Portugal, welcomes applications for:

1-One postdoctoral position is available for an enthusiastic post-doc to join our translational immunology team. To apply send your CV, a motivation letter and the name of three referees to helena.soares@nms.unl.pt.

Funding is available from October 2018 (start date flexible) for up to two years and half in a first instance. The salary will be according to the national research and technology foundation guidelines. Applications will be accepted until the position is filled.

Project summary

Soares lab research breaches immunology and clinical research. We start with clinical data and tissue samples from patients and probe for the cellular and molecular mechanisms involved. Research will focus on defining the basis and consequences of a pathogenic T cell population in the development of Rheumatoid Arthritis. The project will include high-throughput studies to identify genes/drug targets and molecular and cellular characterization of pathogenic circulating T cells. Additionally, tissue explants will be used to elucidate the role of tissue microenvironment in the regulation of chronic inflammation.

Qualifications

- PhD in Life Sciences or other relevant areas
- Solid background in Immunology and/or Disease Mechanisms
- The candidate should be a self-starter and be able to work independently in a team environment
- Productive scientific contributions
- Strong commitment to science
- Excellent knowledge of English
