

# Perspectives in Translational Medicine

EMBL PARTNERSHIP CONFERENCE

YIM Meeting

## **Registration process:**

Please register for the EMBL Partnership Conference first. Once registered, you will receive an email to submit your abstract. The **registration for the Young Investigators Meeting (YIM)** is only possible **during abstract submission**.

You is highly encouraged to submit an abstract for a poster or a flash talk during the conference, irrespective of the stage of your research. This is an excellent opportunity to make your research visible to a larger community, enabling you to get feedback and build collaborations with EMBL and EMBL partner institutes.

## **Introduction:**

The **Young Investigators Meeting (YIM)** will take place at EMBL Barcelona on **27–28 September 2019**. The meeting will bring together PhD students and postdoctoral fellows from EMBL, CRG, the Hubrecht Institute and the Nordic EMBL Partnership Nodes: Institute for Molecular Medicine Finland (FIMM), Centre for Molecular Medicine Norway (NCMM), Laboratory for Molecular Infection Medicine Sweden (MIMS) and Danish Research Institute of Translational Neuroscience (DANDRITE). The Young Investigators are invited to meet following the **EMBL Partnership Conference “Perspectives in Translational Medicine”**, 25-27 September 2019.

The 1.5-day programme is especially tailored to early-career researchers and aims to enhance networking and collaborations among young scientists. The event will include panel discussions with young group leaders, as well as sessions on effective time management and job opportunities in industry,

academia and beyond. YIM provides an excellent opportunity to meet peers from different institutes, discuss scientific discoveries, exchange ideas and experiences, get inspired and, most importantly, to have fun.

## **Organizers:**

### **EMBL**

Inessa De (postdoc)

Cosimo Jann (PhD)

### **Hubrecht Institute**

Kim de Luca (PhD)

Kim Laband (postdoc)

### **MIMS**

Nunya Chotiwan (postdoc)

Dorothee Langenbach (postdoc)

### **FIMM**

Mehreen Ali (PhD)

Prson Gautam (postdoc)

### **DANDRITE**

Antoni Kowalski (postdoc)

Katherine Gill (postdoc)

### **NCMM**

Wietske van der Ent (postdoc)

### **CRG**

Ruggero Cortini (postdoc)

Neus Mestre Farràs (PhD)
